APPEAL FOR FUNDS

The CSC continues to campaign against the criminal injustice done to Construction Workers Health and Safety.

When we first began in 1988 we were the first to raise the demand that bosses who kill workers should serve a term in jail. Many others from both public and private sectors are now taking up our demands that we deserve far better health and safety at work. New ways of working has intensified the pressure on all groups of workers as such workplace stress is having a severe detrimental effect on all of us. Relatives of those killed at work have joined us to demand a safety bill, which will make it far easier to jail guilty employers whose recklessness leads to workers deaths.

We led the way in banning asbestos imports into the UK. This now has led to specify changes to the Control of Asbestos at Work Regulations. While these changes are welcome they don't go far enough. So we require further protective measures be built into these regulations.

We need to demand that legislation be enacted so as to provide for roving safety reps with the full and extended rights that we require to do our jobs.

We need resources to continue our work so that we can publicise the injustice's carried out against the health and safety. We require funds so that we can set up a web site to enable our work to be widely publicised. We need to have workers employed by the CSC so that we can operate an office more effectively. All this takes money. Money we have not got at the moment.

Recent revelations of blacklisting shows how far employers will go so as to prevent workers getting organised. Don't let this or fear of the economic recession put us off of fighting for what we deserve which is better safety and security from for us and our families

Please act on this appeal, affiliate and make as large a donation as possible, as without your support we cannot fully carry out the work of the campaign. Please make all cheques payable to the "Construction Safety Campaign"

If you require a speaker to your organisation please contact us.
